## Skills

---

**Programming Languages:** Javascript, Python, C#, PHP, Java, Bash, PostgreSQL, AQL

**Frameworks:** Node, Angular, Dotnet, React Native, ArangoDB, Wordpress, Laravel, PyQt

**Tools:** Docker, Git, Keycloak

**Soft skills:** Teamwork, Communication, Problem solving, Juggling projects

**Languages:** Slovene, English

## Experience

---

**Developer,** U-centrix– Maribor, Slovenia

Oct 2021 – Present

First development job. With this job I accepted the challenge of learning as much as I got for the time I spent in the job in a factory. I approached it with an open mind and quickly picked up many skills as time went by. Here I am known as a competent developer excited to accept new challenges that may bring me new knowledge.

**Some of the projects I work/worked on:**

- **Booking management platform** - Java, ArangoDB, NodeJs, Angular, Wordpress,
- **Insurance damage assessment platform** - Angular, NodeJs, Angular PWA,
- **Video game betting mobile application** - React Native, Kotlin, Angular,
- **Goods fleet delivery tracking software** - Angular, Node, Keycloak,
- **Custom CRM solution** - Dotnet, Angular, Keycloak,

**Operator 1,** Talum d.d. – Kidričevo, Slovenia

Sep 2018 – Oct 2021

This was my first job. The work I did here was in industrial production. Working with big machinery, dangerous materials and making sure that work was done by the end of the day. Learned how to work in a team.

## Education

---

**Elektro in Računalniška Šola, Šolski Center Ptuj** – Tehnik Računalništva

2013 - 2017
